They take one or two tablets the first night and repeat the third or fifth night if needed. How do Calotabs help Nature throw off a cold? First, Calotabs is one of the most thorough and dependable of all intestinal eliminants, thus basing the intestinal eliminants, the germ-laden mucus and toxines.

Second, Calotabs are diuretic to the kidneys, promoting the elimination of cold poisons from the system. Thus Calotabs serve the double purpose of a purgative and diuretic, both of which are needed in the treatment of colds.

Calotabs are quite economical; Calotabs are quite economical; only twenty-five cents for the family package, ten cents for the trial to do the job. We have many days during the winter months when we cannot do many of the regular jobs on the farm. We also have many days immediately after the rains when the ground is entirely too wet for us to do many things but it is never too wet to dig on your trench silo.

"That's too much, just for a pick and shovel stiff. I'll put up the grub and outfit for all hands."
